

Why specify an **ECA** Member?

Minimise your project risk by appointing
electrical contractors you can trust

Credible

Competent

Compliant

About ECA

ECA is the UK's leading trade association for the electrotechnical services industry, and our Members represent excellence within the industry.

To become an ECA Member, electrical contractors must demonstrate they are credible, competent and compliant with industry standards.

The role of a **specifier** — whether you are a consultant, main contractor, architect, or engineer — is **critical** in ensuring that a project meets the required standards of **safety and quality**.

Minimise your organisational and **project risk** by specifying an **ECA Member**.

What makes an

ECA Member

credible, competent and compliant?

Technically
assessed

Backed by ECA's
Assurance Schemes

Supported by qualified
leading experts

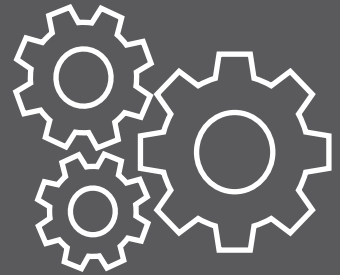

Access to industry-leading
tools to meet specifications
and safety standards

Many meet CAS or SSIP standards

Technically assessed

ECA Members are regularly assessed by the industry's foremost technical certification schemes for competency and compliance.

To be an ECA Member, businesses must be thoroughly assessed for their technical ability and undergo regular, industry-recognised assessments. Through this we can ensure that they work to the highest industry safety and quality standards and that they manage, supervise and carry out work with the necessary skills, knowledge and experience.

ECA recognises the following third-party certification schemes as effective routes to providing this assurance:

ECA Assurance Schemes

Enjoy peace of mind that your projects are protected through ECA's Guarantee of Works and Bond Assurance Schemes.

If you specify an ECA Member you can be safe in the knowledge that work will be completed to applicable standards.

But for that extra layer of security, ECA offers those who specify an ECA Member FREE assurance schemes. Giving you confidence that for six years after completion, work will comply with relevant standards and, like a performance bond, in the event of contractor insolvency, work will be completed*.

*conditions apply.

bsi. standards

Safety and reliability are paramount for ECA Members.

With exclusive discounted access to the BSI Online Standards Library, ECA Members can ensure they are up to date with specific project installation requirements and best practice.

standards

Many ECA Members meet the Common Assessment Standards (CAS) or Safety Schemes in Procurement (SSIP) assessment Standard to show their health & safety capability.

With access to exclusive CHAS discounts, ECA has made it easier for Members to meet core health and safety criteria.

In addition, ECA's qualified Safety, Health and Environment experts provide Members with support that meets 'competent persons' legal requirements and SSIP certification requirements to further showcase their safety compliance!*

*Terms & Conditions apply

Championed by **qualified experts**

All ECA Members have direct access to first-class technical and business support.

ECA Members can ensure they are compliant and competent throughout the project with bespoke industry-leading professional support and guidance covering:

Technical

Employee Relations

Education,
Skills & Worker
Development

Carbon Management

Ensuring ECA Members
at every stage are:

Competent

Compliant

Utilising

tools

industry-leading

ECA Members use our industry-leading tools to ensure compliance with safety standards and Electrotechnical Assessment Specification (EAS) requirements.

eRAMS

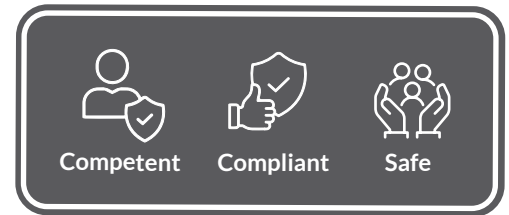

ECA's industry leading online risk assessment and method statement service enables Members to produce suitable and sufficient risk assessments for in-company or supply chain use. Keeping the safety of all involved in their projects is essential.

Learn more about eRAMS >
www.eca.co.uk/eRAMS

eCOMS

ECA Members understand the importance of key personnel being competent which is why they use eCOMS to log and showcase that their staff meet the Electrotechnical Assessment Specification (EAS) requirements.
